

Exploration of Heritage Science data preservation and re-use

- Q1: What type of data do you consider to be heritage science data?
- Q2: How are you currently storing your heritage science data and if you use external providers/systems, what do you use?
- Q3: What guidelines or standards do you follow for the preservation and management of your heritage science data?
- Q4: What does your organisation see as the re-use potential of heritage science data?
- Q5: Do you have any existing examples of how heritage science data has been re-used? (please note briefly)
- Q6: What would help your organisation to preserve, manage and re-use heritage science data?
- Q7: How important is the preservation, management and re-use of heritage science data to your organisation?
- Q8: Is there anyone in your organisation who has responsibility for the curation of heritage science data?
- Q9: What role do you think NHSF could play in facilitating access to, and preservation of, heritage science data to make it reusable?
- Q10: Is your organisation likely to support the principle of Open Access to heritage science data?
